

# GigaIO™ SuperNODE™ - d-Matrix Corsair

## IMMENSE INFERENCE PERFORMANCE

Breaks traditional server limits by consolidating up to 32 accelerator cards, simplifying scalability for demanding processing tasks

## INNOVATIVE AI MEMORY FABRIC

Optimizes AI applications with a memory-centric infrastructure, disaggregating resources for faster, low-latency data transfer

## EMPOWERING SCALABLE INFERENCE

Delivers unprecedented scale and efficiency for next-generation AI inference workloads

## SIMPLIFIED AI DEPLOYMENT

By minimizing the complexity of AI infrastructure, organizations can quickly get inferencing up and running, without the usual delays associated with InfiniBand infrastructure setup

The GigaIO SuperNODE seamlessly presents all accelerators to a single server in an easy, scale-up configuration, enabling expansion without infrastructure complexity.

This scale-up architecture minimizes latency, enhances performance, and reduces power consumption by allowing models to efficiently utilize all GPUs as if locally connected, ensuring rapid scaling of AI workloads with minimal operational overhead.

## Specifications

|                                   |   |
|-----------------------------------|---|
| <b>Accelerators</b>               | 32x d-Matrix Corsair Cards                                    |
| <b>Data rate (each direction)</b> | 512Gb/s (Accelerator-to-Accelerator)                          |
| <b>MXINT8</b>                     | 76.8 PFLOPS   |
| <b>MXINT4</b>                     | 307.2 PFLOPS  |
| <b>Accelerator memory</b>         | 8.19TB DDR5   |
| <b>Failover<sup>1</sup></b>       | Primary and secondary servers                                 |
| <b>CPU cores<sup>2</sup></b>      | 64 AMD EPYC™ "Genoa" 9534                                     |
| <b>System memory<sup>2</sup></b>  | 3.0 TB  |
| <b>Storage<sup>2</sup></b>        | 2x 15.3TB NVMe-U.2 (30TB total)                               |
| <b>Boot drive<sup>2</sup></b>     | 2x 960GB NVMe-M.2   |
| <b>Network<sup>2</sup></b>        | 1x 400G QSFP112-DD, 2x 25G/10G SFP28                          |
| <b>Rack Units<sup>3</sup></b>     | 26U   |
| <b>Rack Power<sup>3</sup></b>     | 30.0kW  |
| <b>Weight<sup>3</sup></b>         | 711 lbs (322.5 kgs)   |
| <b>Cooling</b>                    | Air cooled, airflow front-to-rear (rack handle to power side) |
| <b>Environmental</b>              | Operating Temperature: 10°C to 35°C (50°F to 95°F)            |

<sup>1</sup> Dual head node servers configured identically provide failover standby to maintain up-time

<sup>2</sup> Each server, based on max spec CS511-NA head nodes with 3.0 TB memory, 64 cores, 30 TB storage

<sup>3</sup> Does not include available top of the rack Ethernet switches, rack and PDU(s)
